Sheffield Hallam University

Standard activity risk assessment template

Title of the risk assessment:		**Date:**	Click or tap to enter a date.	**Version:**	
Owner of the activity: *(The owner is the person responsible for the activity and who has the authority to allow it to progress)*					
College / Directorate / Department / Research Centre / Team / School / Institute					

Risk assessor(s) -		
Name:	**Job title:**	**Contribution:**

Review		
Date of last review:	**Date of next scheduled review** **(3 year – maximum interval between reviews)**	**Single (one off) event – not subject to a scheduled review. The dates the risk assessment is valid from and to must be included within this section)**
Click or tap to enter a date.	Click or tap to enter a date.	Choose an item.

Outline / summary of the Activity / Project / Area **(Within this section include details about the location(s) where the activity will be taking place and who will be undertaking it).** **The description on the task will provide the context for the risk assessment.**

Associated documents referenced within this risk assessment. **(Examples - Manufactures instructions, SOPS, SSOW, Other related risk assessments)**	**Location of the associated document and version**

Steps two, three and four – Identify who could harmed and how, evaluate the risks, and decide on control measures, and record your findings									
Hazards (List each of the significant hazards you have identified)	**Who could foreseeably be harmed and how may occur?** (Consider how many people could be affected and vulnerable groups)	**Initial level of risk –** (The risk level without adequate controls in place)			**What control measures are, or will be put, in place to control the risk?**		**Revised level of risk –** (The risk level based on the controls that are already in place, or will be put in place)		
					What are the controls that are already in place?	**What are the controls that need to be put in place?** (Control measures detailed here must be included within the action plan section)			
		L	**S**	**RR***			**L**	**S**	**RR***

*** The Risk Rating (RR) is the Likelihood x Severity = Risk Rating**

Action plan to implement the controls that need to be put in place					
Hazard	**Required action**	**Action assigned to:**	**Resources required**	**Target date**	**Date action completed**
				Click or tap to enter a date.	Click or tap to enter a date.
				Click or tap to enter a date.	Click or tap to enter a date.

Ownership			
To be completed by the activity owner			
I confirm that this risk assessment is an accurate reflection of the activity.			
I am agreeing to the controls that have been identified and accept responsibility for their implementation.			
Activity owners comments / observations / further recommendations / objections			
Owner's name and job title:		**Date**	Click or tap to enter a date.

Risk Matrix

Likelihood The probability of the uncontrolled event which may lead to the injury or ill health happening	**Severity**				
	1 – Insignificant: No injuries or very minor injuries, no harm to health.	**2 – Minor: Minor injuries (e.g., cuts, bruises) or temporary discomfort.**	**3 – Moderate: Injury requiring first aid, or moderate health effects.**	**4 – Major: Serious injury or significant health issues, requiring medical attention or hospitalisation.**	**5 – Catastrophic: Fatal injury or life-threatening health effects.**
5 – Almost Certain: The event will occur or is very likely to happen frequently.	Low	Moderate	High	Intolerable	Intolerable
4 – Likely: The event is likely to happen in many circumstances.	Very low	Low	Moderate	High	Intolerable
3 – Possible: The event might occur occasionally under certain circumstances.	Very low	Low	Low	Moderate	Intolerable
2 – Unlikely: The event may occur, but not often (e.g., happens occasionally).	Very low	Very low	Low	Low	Moderate
1 – Rare: The event is unlikely to occur, or it happens only in exceptional circumstances.	Very low	Very low	Very low	Very low	Low

Very low	No action is required. Ensure existing controls are maintained.
Low	No further action is necessary, but consideration may be given to cost-effective improvements that impose minimal or no additional resource burden. Monitoring is required to ensure that the controls are maintained.
Moderate	Efforts should be made to reduce the risk, but the resources required to do so should be weighed against the risk. If the risk has the potential to move into the red (high risk) close monitoring should be put in place.
High	The risk must be reduced, either through modification of the work, or the introduction of further controls. Close monitoring must be put in place by the owner of the task / activity to ensure that the risks do not move into intolerable. Alert the owner of the activity.

Intolerable	With immediate affect the task / activity must be prohibited from going ahead or continuing. Alert the owner of the activity.
